MEMORANDUM FOR: Chief, Information Processing Staff

SUBJECT : Organization of the Intelligence
Information Handling Committee

1. I have reviewed the 22 April draft memorandum for the USIB dealing with the organization of the IHC and still have the same problem with paragraph 2 that I discussed with you over the telephone a few days ago. There should be no problem with the Agency providing administrative support to the IHC Support Staff at the same level which has been furnished to the CODIB Support Staff, but if there are significant additional unprogrammed requirements the Agency may not be able to honor this blank check. The most serious problem, as you know, will be space which simply is not available at the Headquarters building. Could the last sentence of paragraph 2 be modified to say "CIA will provide.....to the Support Staff within the limitations of current programs and budgets."

2. I also continue to have problems with paragraph 5 b. I do not see how a committee can effectively function in fulfilling responsibilities of developing design specifications. You will recall that we had some difficulty with the interpretation of that term in the discussion at the meeting of the Information Processing Coordinators last Monday.
